

Brown County Schools Formulary List

The formulary list below includes the medications that will be in stock in the Brown County Health and Wellness Center. These medications were selected by utilizing our ideal list of medications that our providers have successfully used at all of our sites for many years and have considered a well-rounded list of meds that allow them to practice family medicine to its full capacity. We have also added medications to this formulary after evaluating the top 100 medications from the claims analysis that are sent on behalf of individuals in the Brown County Schools Health Benefit Trust.

We are happy to make adjustments based on requests and provider input as we go. We will evaluate the formulary and ensure that the medications are accurately being utilized every three months.
