

How Does Wellness For Life Work?

With WFL, fixed monthly rate per member covers 100% of the primary care services for the member while employees have zero co-pays or insurance claims EVER!

How can WFL offer these services at such a low fixed rate?

WFL physicians typically have only 750 patients in their practice -- less than 1/4 of a typical primary care physician--and because they will normally see about 10-12 patients per day, they spend as much time as needed with each patient. Many patient issues, such as medication refills, general medical question, and even questions like "Should I go to an ER?" can be answered quickly and easily over the phone, via text or email. These levels of 24/7 access eliminate the need to leave work to go to the clinic or to make unnecessary trips to ER and Urgent Care centers after normal office hours.

Clinical Value

Standard WFL Clinic Services
